Projects

Full-Stack - GlobalSpeak, Berlin

12/2023–01/2023

I Deployed the Web Application Platform for finding Translators for Calls and Documents on **netlify**.

This App is Build on the Frontend with **React** and **Tailwind**.

For the Backend it runs on **Nodejs** using **Express**.

Authentication is done manly through routing on the backend using a **JSON Web Token** (JWT) which will be set as **Cookie** on the client side.

The data is stored on a relational database using **PostgreSQL** and for readabilty of code i used **Knex.js** to write the queries.

For User Security i used **bcrypt** to store a hashed version of the User Password in the database.

To give the User Feedback on what is happening in the backend the Custom Responses of the Server were Displayed with **React-Toastify**.

The Database was hosted on **ElephantSQL**. The Backend on **Railway**.

Other WebApp Features : **Chat** using SQL tabels,Payment using **Stripe**, Image Upload with **Cloudinary** API

Other Projects, Berlin

09/2023–12/2022

API's for some small projects: **Cookbook** connecting to Contentful, **Pokemon Game** Read data and Writing to database.

MVP's Creating an app in **8 hours** with members of different curse Batches using **Trello** & **Figma** building Strong **Communication skills**: Stock Image Gallery using Pexels API , Random Movie Generator using TheMovieDB API & Storing Locally
